(54) DOT CODE AND INFORMATION RECORDING AND REPRODUCING SYSTEM FOR RECORDING AND REPRODUCING THE SAME

(57)Abstract:

PURPOSE: To record for a long time and to repeatedly reproduce multi-media information including audio information, video information and digital code data, etc., and being recorded so as to be read optically.

CONSTITUTION: A recording device records so-called multi-media information including audio information such as voice, video information obtained from a camera, etc., and digital code data obtained from a personal computer, etc., as a dot code 36 so as to be read optically on a medium such as paper together with a picture 32 and a character 34 by means of a printer system or a palte making system for printing. A pen type information reproducing device 40 successively fetches the dot code 36 in accordance with the manual scanning of the dot code 36 and outputs the original voice to a voice output device 42 such as an earphone, the original video information to a display such as a CRT and the original digital code data to a page printer, etc.
